

5nine Cloud Security *for Hyper-V* Free Edition with Security and Compliance Scanner

Summary

5nine Cloud Security *for Hyper-V* Free Edition provides a comprehensive agentless/host-based security solution for virtual machines running on Hyper-V hosts. Thanks to its innovative agentless design, which installs nothing on the virtual machine itself, the 5nine Cloud Security *for Hyper-V* Free Edition makes virtualized environments work without causing performance bottlenecks or antivirus storms. You get lightning-fast antivirus and antimalware scanning for hosts and virtual machines, a powerful virtual firewall, and control over each VM, all controlled by a centralized intelligent management console.

Built-in Security and Compliance Scanner will help you to investigate present and potential security problems on your server. It also performs an aggressive antimalware scan on a server during the overall scanning process. Upon scan completion Security and Compliance Scanner provides detailed reports on each identified security issue.

Product Description

5nine Cloud Security *for Hyper-V* offers a centrally-managed, comprehensive solution for delivering easy-to-use, powerful protection, with real-time, agentless monitoring across both hosts and virtual machines.

Its modules include:

- Antivirus / antimalware
- Simplified Virtual Firewall
- Security and Compliance Scanner
- Centralized intelligent management console

Antivirus / antimalware

5nine antivirus detects and blocks malicious activities and improves the security of the Hyper-V virtualized environment without antivirus storms and performance bottlenecks, while antimalware provides scans of both virtual machines and hosts, using unique agentless technologies:

- Minimal performance degradation via agentless architecture
- All versions of guest O/S supported by Windows Hyper-V
- Fast, incremental scans
- Orchestrated scans and performance thresholds set across VMs
- Staggered scanning for optimal performance
- Caching across VMs
- Simple centralized management console

Key Points

- **Built exclusively for Hyper-V**
Because this solution is built from the ground up for Microsoft Hyper-V, it offers an additional layer of security and compliance, by leveraging the Hyper-V Extensible Switch and Windows filtering extensions
- **Multi-layered Hyper-V Protection**
Antivirus/antimalware and Simplified Virtual Firewall give you multi-layered Hyper-V protection, for complete protection and full compliance
- **Reduce IT administration headaches**
The powerful, easy-to-use intelligent management console centralizes policies, rules and filters, and eliminates the need to manage and update multiple agents and signature databases—which reduces IT administration headaches
- **Maximize ROI**
With a low footprint and agentless approach that maximizes consolidation ratios and VM density, this solution won't cause performance and resource degradation, and will maximize ROI Hyper-V investments

Virtual Firewall

5nine Hyper-V Virtual Firewall controls traffic between multiple virtual machines, and with external networks. It vastly simplifies the deployment and management of multiple guest operating systems utilizing the extensibility of the new Hyper-V virtual switch.

Security and Compliance Scanner

5nine Security and Compliance Scanner helps to investigate present and potential server security problems. It also performs an aggressive antimalware scan on a server during the overall scanning process. Upon scan completion Security and Compliance Scanner provides detailed reports on each identified security issue.

5nine Security and Compliance Scanner provides:

- Virtual Firewall Status Check
- Extensive Free AV Check
- Performance Check
- IDS Status Check
- Detailed Executive Report
- Security Enhancement Recommendations

Centralized intelligent management console

5nine's intelligent management console provides centralized management and control of security and compliance:

- Powerful, agentless architecture virtually eliminates
- IT administration
- Centralized management control delivers simple
- administration of policies, rules, filters and logs
- Full auditing capabilities for easy compliance

Other benefits you will get with 5nine Cloud Security for Hyper-V Free Edition

5nine Cloud Security for Hyper-V Free Edition uses the extensibility of the new Windows Server Hyper-V Switch, providing protection that spans across multiple hosts and virtual machines (VMs). By integrating agentless firewall and fast, agentless antivirus/antimalware, this solution gives your organization complete protection and compliance.

With 5nine Cloud Security for Hyper-V Free Edition, organizations can:

- Quickly perform antivirus scans with virtually no performance impact
- Substantially improve VM density and maximize the virtualization investment
- Thoroughly secure a virtualized environment
- Ensure compliance with a security and compliance scanner
- Stay in front of and prevent malicious attacks
- Control network traffic between virtual machines

"Use of our Hyper-V high end VPS offering for the clients who host large size sensitive financial data requires high level of security and compliance. Use of 5nine agentless Virtual Firewall and antimalware, utilizing Virtual Firewall and antimalware, utilizing extensibility of Windows Server 2012 Hyper-V switch provides such security measures."

Rob Conley
President and CEO of Reseller Choice

System Requirements:

Host Operating System:

Windows Server 2012 R2

Microsoft Hyper-V Server 2012

Windows 8

Guest VM Operating System:

Any Guest VMs supporting NTFS, while most of Ubuntu and CentOS VMs are controlled with our solution

Prerequisites:

Microsoft SQL Server, Microsoft SQL Express or Compact Editions

.NET Framework 4.0
